

Loral Skynet gets you “Back to Business” when disaster strikes.

Rapidly restore your IP network via a highly reliable alternate transport path that’s completely independent from terrestrial communications.

Network outages are a fact of life in today’s business world. Whether your outage is due to man-made or natural events, Loral Skynet’s Disaster Recovery service supplements existing network contingency plans and provides rapid resumption of network connectivity and business operations. Only Skynet offers a portfolio of contingency services that includes *SkyReach* Ensure Business Continuity. In addition to ensuring peace of mind with the highest levels of network availability, Skynet’s contingency services allow businesses to comply with increasingly fault tolerant requirements and regulatory mandates availability for critical business functions to remain available and productive.

Key Features of *SkyReach* Ensure Business Continuity:

- Rapid recovery and restoration of critical business functions on a temporary or permanent basis
- Highly customized services to meet your operational and business requirements
- Leverages high availability of Skynet’s integrated broadband satellite network to provide capacity and connectivity when you need it
- Easily integrated into customer contingency plans and network infrastructure
- Provides flexibility to address mission-critical network capacity requirements
- Quality of Services (QoS) via Loral Skynet’s 24x7x365 Network Operations Center
- Easily integrated Service Level Agreements (SLAs) for operational simplicity and continuity
- Flexible and cost-effective pricing

Disaster Recovery services minimize down time, lost revenues, and exposure to service penalties:

- Recovery of customer networks and remote site locations
- Provides path protection for critical circuits to support restoration services
- Comprehensive contingency services provides unsurpassed network availability
- Highly responsive activation and customer management

Delivering a Competitive Advantage.

Loral Skynet provides:

- Resilient and proven satellite IP network connectivity
- Operational simplicity and efficiencies from a single point of service provider
- Flexible solutions that are scalable and easily deployed
- Responsive 24x7x365 global customer support services through Skynet's Network Operations Centers (NOCs)
- Customized approaches for installation, licensing, and site maintenance support
- Integrated and responsive global Ground Operator network covering more than 75 countries
- Guaranteed Quality of Services (QoS) through Service Level Agreements (SLAs)
