

Loral Skynet's Business Continuity strategy keeps you in business.

Seamlessly backup your IP network with a reliable and continuously provisioned satellite broadband solution.

Maintaining high network availability and accessibility are critical to all businesses. Loral Skynet's Business Continuity solution, *SkyReach Ensure*, provides a continuous and automatic IP data-traffic transfer from terrestrial networks to a highly reliable global satellite IP connection. *SkyReach Ensure* enables all businesses to maintain revenue-generating capabilities and quality of service despite sudden network interruptions or outages. You can also reduce your risk during network upgrades and maintenance. Equally important, *SkyReach Ensure* allows for your compliance with increasingly fault tolerant requirements and regulatory mandates to ensure critical business functions remain available and productive.

Key Features of *SkyReach Ensure*:

- Proactive network assessment and automatic failover to a satellite connection if primary terrestrial WAN connection is lost
- Continuously provisioned satellite capacity to meet network and business requirements
- High availability of Skynet's redundant broadband satellite network
- Seamless integration to your existing network infrastructure
- Asymmetric topology for high-speed downlink
- Leverages proven Loral Skynet products, services and expertise as well as globally robust integrated terrestrial and satellite network
- Multi-purpose connectivity to support IP over satellite for content distribution, multimedia (data, video and voice), Video on Demand (VoD) as well as Business Continuity
- Dynamic management system for Quality of Services (QoS) via Loral Skynet's 24x7x365 Network Operations Centers (NOCs)
- Flexible and cost-effective pricing models:
 - Flat fee unlimited use
 - Reservation and usage-based

Business Continuity provides cost-effective insurance against interruptions and outages:

- Seamless failover of customer networks and remote site locations
- Effective network monitoring for automated failover
- Provides path protection for critical circuits to support expansion and backup services
- Contributes toward an unsurpassed level of network service availability
- Connectivity to support business and access continuity applications

Delivering a Competitive Advantage.

Loral Skynet's Business Continuity provides:

- Real-time failover ideal for high data volumes and validation requirements of the global financial sector
- Diverse and separate backup ensures highly available connectivity
- Gains from operational simplicity and efficiencies from a single point of service provider
- Facilitates resource management and load balancing to improve utilization
- Flexible solutions that are scalable and easily deployed
- Customized solutions tailored to specific customer requirements
- Proactive 24x7x365 global customer support services through Skynet's network operations centers (NOCs)
- Installation, licensing, and site maintenance support
- Skynet's Ground Operator network covering more than 75 countries
- Guaranteed Quality of Services (QoS) through Service Level Agreements (SLAs)

Need more?

Business Continuity is part of Skynet's Global IP Network Services portfolio providing risk mitigation services and cost effective options for maintaining high availability networks and business operations.
