

Loral Skynet provides comprehensive VoIP solutions worldwide.

Strategic partnerships provide global distribution for proven VoIP services to the world's most challenging Internet environments.

Key Features of *SkyReach* VoIP:

- Inbound and Outbound solutions for both residential and enterprise
- Carrier-grade platforms provide seamless, global coverage
- Turn-key, hosted solutions facilitate implementation and reduce operational expenditures (OPEX)
- Cost-effective support for global communications requirements
- Minimized risk without investment in full VoIP infrastructure
- Flexible support for multi-port gateways, IP phones/ATAs and soft phones with auto-provisioning tools
- Rapid deployment with minimal subscriber support
- Real-time prepaid billing is scalable for increased volumes
- Deployed in more than 100 countries around the world on all types of IP connections
- Hosted PBX options for enterprise
- Integrated voicemail among remote sites and points of presence
- Individual Calling Features include:
 - Call Hold/Wait/Forward/Park
 - Caller ID
 - Voice Mail
 - Direct Inward Dial (DID's) or extensions
 - 6-Way conferencing
 - Person-to-Person Intercom
 - Web Portal
- Extensive Group Calling Features include:
 - Unified messaging (voice to email)
 - E911 service
 - 4-digit on-net dialing
 - Multiple-layered auto attendants
- Service Level Agreements (SLAs) ensure Quality of Services (QoS) via 24x7x365 customer support

Hosted VoIP services provide:

- Lower cost of entry for global service providers
- Reduced OPEX and back office management for enterprise connectivity
- Highly flexible and scalable global solutions from SOHO to enterprise
- Increased productivity and mobility of globally distributed business units
